

Michał Noga

Front-end Developer

MY JOURNEY

My first contact with front-end development was way back in 2009, when I created an official website for the school I was in. After that, I made an official website for my high school. I was proud of my work but wasn't sure if I could make a living out of coding. After I received a master's degree at a university, I decided to go back to IT, and since early 2019, I have worked as a full-time front-end developer.

You can reach me by:

MY SKILLS

Most of the time I use:

HTML CSS JavaScript SASS/Scss TypeScript React Vue 2 & 3 Cypress Jest React Native
Husky ESLint Prettier npm git GitHub GitLab Figma Vite Redux Toolkit

I know how to make:

SPA PWA RWD pixel-perfect websites Design systems Component libraries npm packages
browser extensions cross-platform apps

I know how to use:

BEM Storybook REST API yarn nvm Docker Material UI styled-components Bootstrap
Pinia Async Storage Adobe Photoshop Adobe XD Jira Linux Windows Mac OS Scrum
Agile LambdaTest i18n Nuxt.js GitLab CI/CD

I used to work with (on a basic level):

jQuery Ajax PHP Laravel Gulp Webpack Firebase GraphQL Wordpress Prestashop

EMPLOYMENT HISTORY

Software Developer specializing in Front-end

BIT Michał Noga / 03.2022 - Currently

Nowadays, most of what I do is web applications, user and admin panels, and design systems. I still create designs and all sorts of websites. Part of my time is dedicated to mentoring less experienced developers I've met along the way. In my spare time, I create cross-platform applications.

Front-end Developer i Web Designer

4 Freelancer / 03.2021 – 02.2022

During my time as an independent contractor, I cooperated with my previous companies and widened my base clients by learning new technologies and frameworks. I was mentoring, creating websites and serving as a tech support at this time.

Front-end Developer & Web Designer

3 WeMakeIt / 10.2020 – 02.2021

During my time working with WeMakeIt, I successfully helped launch this marketing agency and created multiple diversified websites for clients from the automotive, cosmetology, and ecology industries among the others.

Front-end Developer & Designer

2 Dianet / 06.2019 – 05.2020

In Dianet, I was responsible mostly for coding pixel-perfect websites and creating graphics, logotypes, and web designs. Part of my job was setting up WordPress websites and editing them using HTML, CSS, Scss, jQuery, and the basics of PHP, Laravel, Bootstrap, and Ajax. I was also heavily involved in the recruitment process for junior developers and designers.

Internship: Template creator & Graphic designer

1 Katamaran / 08.2017 – 10.2017

During my time as an intern, I was responsible for creating HTML and CSS templates for auctions and preparing graphics for marketing purposes.

LANGUAGES & EDUCATION

Polish (Native),
English (B2 / C1),
Germany (A1)

Studied at University of Lodz.
Completed in 2018 with a master degree in administration.
